

ELECTRACORE

3.0mm Rechargeable Heated Vest

Provide heat to give complete warmth to the body when working in cold conditions.

The Northern Diver 'Electracore' heated vest has been designed and manufactured with your comfort and warmth in mind.

The three heat settings allow you to pick a temperature that suits you and if it happens that you want to raise or lower the temperature, the switch has been positioned in an easy to reach position to the left of your midriff – ensuring that even when you're wearing your suit, the button remains easy to access.

The **Electracore** has been made using a flexible 3.0mm black neoprene shell along with a snug fleece inner lining maintaining comfort for the user, whilst also insulating and reflecting the heat back on to the body, so even if the vest is turned off, there will still be noticeable thermal benefits. The colour of the On/Off button will identify the heat of the vest.

The built in heat panels are waterproof, CE approved and conforms to EN 61000-6-1:2019, EN 61000-6-3:2007/A 1 :2011/AC:2012.

Why use a heat vest?

Working efficiency increases
Working safety increases
Mobility is better (no need to wear multiple layers)
Comfort increases
Even though you don't move, you feel warm

Sizes: S, M, L, XL, XXL
Colours available: black

Note the battery pack is NOT waterproof. This garment has been designed to be worn underneath a drysuit when being used in and around water.
