SUITS & EQUIPMENT  
SUPPLIED BY NORTHERN DIVER

## LIGHTWEIGHT 210D SURFACE SUIT

Our Storm Force 4 (F4) is the breathable tri-laminate drysuit that evolved from our popular Storm Surface Drysuit fitted with BDM metal zip and supplied in a drawstring bag.

The stock models have neoprene neck and wrist seals, with heavy duty latex dry socks, designed to be used with any Northern Diver boot or similar in-water footwear.

Available in sizes : S, M,,ML, L, XL, XXL, XXXL  
Front & rear entry options available

## WATERSPORTS FOOTWEAR

We manufacture all manner of watersports footwear, from anti-slip safety boots to wetsuit boots for warm water use. We also offer a wide range of thermal socks. Our drysuits can be supplied with integrated boots or socks.

Tested to  
EN 12402-5:2006  
EN 12402-6:2006

# ARCTIC SURVIVOR EVO X PFD

Made from Red 500D CORDURA® and rip-stop nylon with a breathable mesh interior lining and an ISO approved floatation foam core, the Evo X is the ideal, durable PDF for watersports. It's front entry with quick release x-lock buckles so it's easy to don and doff.

Designed for water rescue teams, the Evo X comes with adjustable shoulder straps, reinforced stitching & an anti-slip waistband. With reflective piping & Refl-exite® prismatic bands so you can be easily seen in low light. There's also a zipped front pouch, pealess whistle, cowtail & carabiner.

Available in 3 sizes:

Medium - chest up to 106cm/42", weight 76kg (>75N)

Large - chest up to 116cm/46", weight 95kg (80N)

XL - chest up to 142cm/56", weight 115kg (>85N)

# EVO v.D X

# SEAHAWK

Great all-round protection. Suitable for white water and swift water rescue. The shell drops below the ear for extra protection and helmet stability. The split-mould injection process creates a very rigid shell and an ergonomic "negative draft" shape that follows the natural curves of the head, protecting the forehead and base of the cranium. Conforms to EN 1385:2012

Size: ONE (55cm - 62cm head) | Colours: Glossy orange, white + red. Matt black + yellow

# FLEXI-LIGHTS

**100% waterproof & depth tested to 300m**  
**Greater light output from the LED**  
**With low power, high power & flashing modes**

**The modern alternative to chemical light sticks.**

**Features**

- Simple press to operate button
- 4 Modes
  - Low power (burn time 40 hrs)
  - High power (burn time 22 hrs)
  - Flashing (burn time 42 hrs)
  - Off
- 100% waterproof
- Double sealed construction
- Flexible silicone body
- Non-replaceable battery
- Depth tested: 300m
- Output : 8 lumens
- Burns brighter than traditional glow sticks - up to 3x brighter than standard glow sticks
- Visible distance : up to 3km
- 5 colours & IR (wavelength 625-635 NM)
- Non-sparking & non-heat producing

**Flexi-Lights available with:**

- Adhesive backed 3M™ tape
- Adhesive backed 3M™ foam
- 3M™ hook Velcro backing

All light sticks can be used with the nylon Flexi-Light Clip (below)

# WETSUITS

## WETSUIT BRANDING

We can brand your wetsuit so it's bespoke. Tell us the name, logo or lettering you'd like. We'll add it to the arm, leg, front or rear of your wetsuit - wherever you choose.

Northern Diver wetsuits are all made from compressed neoprene. Wetsuits work by trapping a thin layer of water around your body which provides some thermal protection. It's important to get a fairly snug fit for your wetsuit.

Our wetsuits come in a variety of thicknesses. A thickness of 1-3mm is for tropical water with a temperature range of 26-30°C, 5mm wetsuits are for 23-26°C and a 7mm semi-dry suit should comfortably cover the 17-22°C range.

Ideal for divers, surfers, windsurfers, canoeists, paddleboarders and any watersport enthusiast. Semi-dry suits are usually provided for trainees in UK water.

If you're doing a lot of watersports in the UK, you should think about whether to invest in a semi-dry or splash out on a full drysuit.

# WATERPROOF DRY BAGS

We offer a variety of drybag shapes, sizes and styles to suit you and the kit you want to carry. They're tough, lightweight, waterproof and airtight. Our Dry seal bags - Roll top and the Subsac offer a unique closing system and come with a valve to remove excess air so you can compress them down as much as possible.

## DRY SEAL ROLL TOP BAGS

Our Dry Seal dry bags have a secure 100% watertight closure, the dry seal creates a vacuum like seal which is why it won't let water in. Manufactured from a strong, high quality 420D TPU making them flexible and durable.

Available sizes: 10L, 20L, 50L and 120L  
Colours: red and black

## ROLL TOP BAGS

Made from heavy-duty PVC, they're flexible, durable and scratch and scuff resistant. The dry bags feature a roll-top quick-release Fastex clip system which enables you to securely close and seal the dry bag.

Available sizes: 12L, 51L and 117L  
Colours: red, black, yellow and orange

## SUBSAC HOLDALL

Manufactured from the same strong black 420D TPU that our latest dry bags are made from. This holdall holds an incredible 90L and is fitted with the same 100% water/air tight dry seal. Completely leak proof this bag will not fail you in any scenario.

Available sizes: 90L  
Colours: black

## YKK® ZIPPED DRY BAG

A large watertight and airtight bag weighing only 880g. The YKK® zipped dry bag is manufactured from 500D PVC and has welded seams for extra reinforcement. Adjustable, padded shoulder straps and is load tested to 100kg.

Available sizes: 60L  
Colours: red and black

# RR4 SLED

A specialist water rescue craft from Northern Diver. The RR4 rescue sled is a versatile craft designed for use in rivers, lakes and flooded urban and coastal areas. Its lightweight, portable design allows for it to be carried into remote bodies of water, for example in mountains.

With an extended platform on the stern, the sled can help provide efficient casualty recovery. Stability is aided by the sponsons and 15 centimetre-thick double walled floor. The sponsons are finished with rubbing strakes and have a diameter of 23 centimetres each.

Multiple grab handles of different sizes are present all around the sled, and the craft is also fitted with 19 D-rings.

The RR4 is very manoeuvrable, suitable for shallow water and can be paddled, pulled by hand or towed by a jet ski, boat or small hovercraft.

# LIFEBOARD

Easy to transport and set up, lightweight and super strong, our inflatable rescue board is for use when the casualty is conscious and able to hold on to the board.

Towed behind a personal water craft (PWC), the board can reach the casualty in a quick, agile manner, which is pivotal in swift/rough water rescue scenarios.

In calmer conditions, the board can be used to swim out to the casualty, rather than with a PWC, and can be used to carry the casualty to safety with the rescuer swimming and pushing the board.

# RR-MAX RAFT

Manufactured from 15cm drop stitch and PVC with built in inflation points and valves in multiple places. The RR-MAX has 13 316 stainless steel 40mm d-rings, 5 lifting handles plus another 4 handles on the non-slip floor.

Inflatable is shown in red but the RR-MAX is available red, yellow, black, green and orange. Team branding can also be applied.

A cylinder can be connected to the inflatable for quick and easy inflation, multiple hoses could also be used for even faster inflation!

View all inflatables at [www.ndiver-rescue.com](http://www.ndiver-rescue.com)

# iSUP

We're proud to present to you our all-round inflatable stand-up paddle boards (iSUP) that we think offer the ultimate in versatility and quality. Packed full of features, the Aquarius iSUPs are designed to deliver an enhanced performance for calm or choppy water.

The 10'6" Aquarius iSUPs are 32" wide and with an EVA anti-skid pad on the deck they offer an ideal stable platform, whether you're into SUP Yoga, touring on calm water, paddle board sharing or you want to take on a few rapids. The Aquarius is light, tough and nimble in the water. You can even share your paddleboard adventure, our paddle boards can fit two people on.1

When fully inflated at 22psi, the Aquarius iSUP can hold up to 110kg (240lbs), thus offering a feel and performance comparable to a hard board. Whether you've never been on a SUP or you're a seasoned pro, our paddleboards offer a great product at a great price. Our iSUP design means the inflatables are steady in water while also being narrow enough to ensure they don't affect your paddling speed. The 32" width and 6" thickness combine so you benefit from good rigidity and stability. The rounded shape improves glide performance making it handle very well and suitable for beginners.

Our SUPs come with an ankle strap, fin, pump, paddle and bag so they're an ideal addition to your iSUP collection or the perfect starter kit.

## What's included with the iSUP?

1. Within the maximum weight limits.
