

DIVE REEL WITH 60M HIGH VIS ORANGE LINE & TORCH MOUNT

Our innovative Northern Diver line reel has a unique design and it has been manufactured from a combination of anodized aluminium and synthetic polymers, to make it strong, lightweight and corrosion resistant. The free-flowing spool has a thumb operated spool-lock, to ensure controlled line deployment and a 'sprung' reel handle. Allowing the handle to extend whilst in use, if wearing gloves but springs back to half its length, for easy storage. Supplied complete with 60m (197') of high-vis orange reel line.

The reel also incorporates an attachment point on the top and rubber fixing band allowing you to easily mount Northern Divers Varilux Micro Dive Torch. Ideal for hands-free directional light, ideal for lining out in reduced visibility (within a wreck). Other torches of a similar size to the Micro may be mountable but you should check dimensions first.

In addition, the reel has its own wrist lanyard which can be easily removed to provide the diver with a convenient backup torch. The reel can be purchased on its own or as a complete package with the Varilux Micro Dive Torch.

REEL FEATURES

- Anodized aluminium
- Free-flowing spool with thumb operated spool-lock
- Unique 'sprung' reel handle for easy storage
- Top mounted torch attachment point and rubber fixing band
