

# NORTHERN DIVER

LOCATION MARKER FLOAT MANUAL

## NORTHERN DIVER 600G LOCATION MARKER FLOAT MANUAL

### OPERATIONAL INFORMATION

The Location Marker Float 600G can be quickly and easily deployed from the surface or underwater as a marker for lost items or to mark a location. The float sits high in the water and the strobe is easily seen at night and in any weather.

#### Features:

- Reusable, with 40m line length.
- High visibility strobe: Burn time 7 days+
- High visibility ABS yellow foam body

**TO TURN THE STROBE ON** – turn black toggle anticlockwise

**TO TURN THE STROBE OFF** - simply press down on the black toggle and turn clockwise

### HOW TO CHANGE THE STROBE BATTERY

Please make sure you follow all the steps, taking extra notice of the battery position.

**Step 1** – Make sure the arrow is pointing up (as shown below)

**Step 2** – Using pliers pull the black arrow out completely

**Step 3** – Turn the location marker so you are looking at the bottom, then use a long implement to push the light out (using a screw driver or something similar)

**Step 4** – The light should pop loose and come apart from the Marker

**Step 5** – Separate the light from the Marker, setting aside the Marker

## Step 6 – Unscrew the plastic cap

## Step 7 – Remove the bulb, and replace the battery

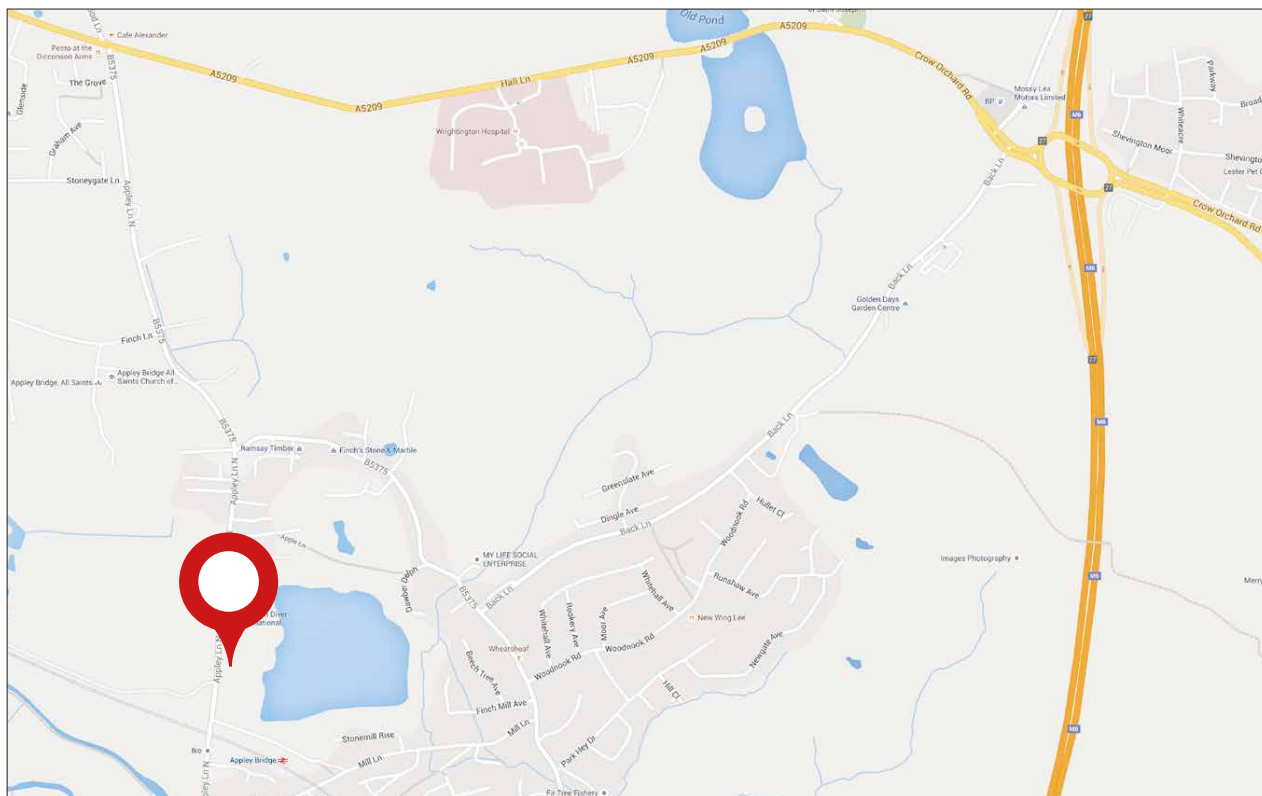

**Step 8** – Once the battery has been replaced, reattach the bulb  
**IMPORTANT** - Make sure the metal plates align when slotting them back together

Repeat all the steps in reverse. Going from step 8 to the Step 1 –in order to put it back together, making sure that arrow is pointing down to lock the mechanism when finished.

## Find us
