

3MM & 5MM BLACK MILITARY WETSUIT

Elbow protection pads

Knee protection pads

Branding available upon request

Conservatively all black, this wetsuit will look professional during pool training but it is equally suited to overseas 'warm water' snorkelling and/or diving. Manufactured from super comfortable 'Flat-Lock' stitched neoprene available in 3mm and 5mm, for good insulation without compromising on movement and featuring an extended zip tape, for easier fastening.

The rear entry zip has an added internal neoprene protection panel and the collar has an adjustable hook and loop fastener tab, for extra security. The knees and elbows have added reinforcement for extra protection in those high wear areas.

Equally suited to warm water diving and snorkelling, in addition to many other (warmer) watersports. Logo branding is available on this wetsuit upon request.

Features:

- Available in 3mm or 5mm neoprene
- Suitable for more temperate diving
- Flat lock stitching
- YKK® Rear Entry Zip
- Knee and elbow protection

Available in sizes : M,,ML, L, XL, XXL
